Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I      Claims 1-24 and 31-37, drawn to a nucleic acid, vector, host cell and a recombinant method to make tissue plasminogen activator (tPA), classified in Class 536, subclass 23.2; Class 435, subclass 219.
- Group II     Claims 25 and 26, drawn to the fusion protein of SEQ ID NO: 8, classified in Class 435, subclass 7.2.
- Group III    Claims 27-30, drawn to a K2S, classified in Class 530, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

The nucleic acid of Group I, the fusion protein of Group II, and the H2S protein of Group III are independent chemical entities and require different searches in the patent and non-patent literature. Claims drawn to method of making proteins using the recombinant DNA would be placed with the DNA of Group I because, although they have acquired a separate status in the art as shown by their different classification, they do not constitute a burden to search them in addition to the DNA sequences.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Judith Kim on June 3, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
